

Kg1 Science Book

Table of Contents (Book should be read with parents)

- 1. Introduction**
- 2. Chapter 1: Living and Non-Living Things**
 - a. 1.1 What are Living Things?
 - b. 1.2 What are Non-Living Things?
 - c. 1.3 Differences Between Living and Non-Living Things
- 3. Chapter 2: The Five Senses**
 - a. 2.1 What Are the Five Senses?
 - b. 2.2 Exploring Each Sense
 - c. 2.3 Fun Activities to Use Your Senses
- 4. Chapter 3: Weather and Seasons**
 - a. 3.1 What is Weather?
 - b. 3.2 The Four Seasons
 - c. 3.3 How Weather Affects Us
- 5. Chapter 4: Plants and Animals**
 - a. 4.1 What Are Plants?
 - b. 4.2 What Are Animals?
 - c. 4.3 The Relationship Between Plants and Animals
- 6. Conclusion**
- 7. Glossary**
- 8. Fun Quiz**

Introduction

Welcome to the Kg1 Science Book! This book is designed especially for you, young explorers, to help you discover the amazing world around you. Science is all about asking questions and finding answers. In this book, we will learn about living and non-living things, our five senses, the weather and seasons, as well as plants and animals. Are you ready to start your adventure? Let's go!

Chapter 1: Living and Non-Living Things

1.1 What are Living Things?

Living things are all around us! They are anything that grows, changes, and can reproduce. This includes humans, animals, and plants. Living things need food, water, and air to survive.

Examples of Living Things:

- **Humans:** We eat food, drink water, and breathe air.
- **Animals:** Dogs, cats, birds, and insects are all living creatures.
- **Plants:** Trees, flowers, and grass are also living things because they grow and need sunlight and water.

1.2 What are Non-Living Things?

Non-living things are things that do not grow, change, or need food and water. They can be natural, like rocks and rivers, or man-made, like toys and buildings.

Examples of Non-Living Things:

- **Natural:** Rocks, water, and air.
- **Man-Made:** Cars, books, and furniture.

1.3 Differences Between Living and Non-Living Things

Living Things	Non-Living Things
Grow and change	Do not grow or change
Need food, water, and air	Do not need anything

Chapter 2: The Five Senses

2.1 What Are the Five Senses?

Our body has five senses that help us understand the world around us. They are:

1. **Sight:** We see with our eyes.
2. **Hearing:** We hear with our ears.
3. **Touch:** We feel with our skin.
4. **Taste:** We taste with our tongue.
5. **Smell:** We smell with our nose.

2.2 Exploring Each Sense

- **Sight:** Look at colors around you. What colors can you see?
- **Hearing:** Listen to different sounds. Can you hear beautiful sounds?
- **Touch:** Feel the texture of different objects. Is it smooth or rough?
- **Taste:** Try different foods. What does sweet, sour, or salty taste like?
- **Smell:** Smell perfumes or food. What smells do you like?

2.3 Fun Activities to Use Your Senses

- **Sight:** Go on a nature walk and spot different colors.
- **Hearing:** Close your eyes and listen to the sounds around you.
- **Touch:** Create a texture box with different materials (e.g., cotton, sandpaper).
- **Taste:** Have a taste test party with different fruits.
- **Smell:** Identify different scents in your kitchen.

Chapter 3: Weather and Seasons

3.1 What is Weather?

Weather tells us what is happening in the sky. It can be sunny, rainy, cloudy, snowy, or windy. The weather changes every day!

3.2 The Four Seasons

1. **Spring:** Flowers bloom, and the weather gets warmer.
2. **Summer:** It is hot, and we enjoy playing outside.
3. **Autumn (Fall):** Leaves change color and fall from trees.
4. **Winter:** It gets cold, and we might see snow!

3.3 How Weather Affects Us

- **Sunny Days:** Great for playing outside!
- **Rainy Days:** We might need umbrellas and raincoats.
- **Snowy Days:** Perfect for building snowmen and having snowball fights!

Chapter 4: Plants and Animals

4.1 What Are Plants?

Plants are living things that grow in the ground. They have roots, stems, and leaves. Plants need sunlight, water, and soil to grow.

Examples of Plants:

- Trees
- Flowers
- Grass

4.2 What Are Animals?

Animals are living beings that can move and eat food. They can be pets, wild animals, or even insects!

Examples of Animals:

- Dogs
- Cats
- Birds
- Fish

4.3 The Relationship Between Plants and Animals

Plants and animals depend on each other. Animals eat plants, and plants need animals to help spread their seeds. This is called a food chain!

Conclusion

Congratulations, young scientists! You have learned about living and non-living things, the five senses, weather and seasons, and the wonderful world of plants and animals. Keep exploring and asking questions about the world around you. Science is everywhere!

Glossary

- **Living Things:** Organisms that grow, change, and reproduce.
- **Non-Living Things:** Objects that do not grow or need anything.
- **Senses:** Ways we perceive the world (sight, hearing, touch, taste, smell).
- **Seasons:** Different times of the year (spring, summer, autumn, winter).

Fun Quiz

1. What are the five senses?
2. Name one living thing and one non-living thing.
3. What happens in spring?
4. How do plants and animals help each other?
5. Can you name a plant and an animal?

Thank you for reading the Kg1 Science Book! Keep exploring and have fun learning about science!
